

TRES RIOS RIVER

Who knew that Tres Rios River Resort (named for three converging rivers: the Brazos and Paluxy rivers and Squaw Creek) is also located in the town that rightly claims to be the Dinosaur Capital of Texas? Visitors here can examine a large number of real dinosaur footprints in the bed of the Paluxy River.

Since Tres Rios Resort is close to three rivers, there's ample opportunity for river riding, swimming, tubing, canoeing and other water sports. Yes, there are fish to catch in the three waterways, plus the camping resort has a fishing area of its own.

Tres Rios stands on 47 beautiful acres that provide most anything you'd like to do in the great outdoors, from bird watching to billiards, boating to basketball and lots more in between. The friendly, helpful staff delights in making sure guests have a great time at the resort and in the area.

Central Texas is a fun vacation destination, and that dinosaur business is serious. Dinosaur Valley State Park, just outside Glen Rose, has walking trails, scenic picnic areas and some of the best-preserved dinosaur tracks in the world. There's also nearby Fossil Rim Wildlife Center, an 1,800-acre wildlife preserve featuring a variety of animal species, including emus, giraffes, zebras, wolves and many others, many of which are allowed to roam freely.

Back in historic Glen Rose, you can visit the quaint, bustling downtown area with its wonderful antiques stores, interesting shops and variety of appealing restaurants. Time in Glen Rose will be time well spent.
